Spartan Controls Hiring Team,
Spartan Controls

Dear Spartan Controls Hiring Team,

I am writing to express my enthusiastic interest in the IOT Data Specialist position at Spartan Controls. With a strong foundation in full-stack development and hands-on experience building data-intensive applications using Python, JavaScript, PostgreSQL, and cloud platforms like Supabase and Firebase, I am well-equipped to contribute to your mission of driving sustainable automation through intelligent data solutions.

In my recent freelance and contract work, I've engineered RESTful APIs, integrated third-party data sources, and built user-facing dashboards that transform complex data into actionable insights—skills directly transferable to designing and testing purpose-built IoT data systems. My projects, such as the AI-powered travel planner and real estate CRM, demonstrate my ability to manage data flows, ensure application security, and deliver reliable, scalable software in Agile environments.

As a developer passionate about solving real-world problems with clean, efficient code, I'm eager to bring my technical versatility, client-focused mindset, and rapid learning ability to your Digital Foundations team. I welcome the opportunity to discuss how I can support Spartan Controls in delivering innovative, data-driven automation solutions.

Thank you for your consideration.

Warm regards,

HARJAP SINGH
